

MODULAR PLUGS

KEY FEATURES

- Fits 24-26 AWG
- Reliable and fast connection
- 50 micro-inch thick gold plating
- Polycarbonate housing

D-Link Category 6 Modular Plugs are suitable for both 24-26 AWG stranded and solid cables. This modular design means they can be used for a wide range of networking needs that span across a whole business system, eliminating the need to constantly switch between plugs when cabling. Compatible with standard RJ45 Wire network crimping tools, D-Link CAT6 modular plugs fit seamlessly into any well-established standard operating procedure, making cable assembly easy.
