

The D-Link Modular Plug Crimper is suitable for the crimping of RJ45, RJ11 and RJ12 modular plugs. It fits 22-26 AWG wires.

The Punch Down Tool helps with the termination of twisted pair cables to the keystone jacks. The colour-coded yellow handle on the cut side of the tool reduces the chance for termination errors. The simplified internal impact mechanism eliminates jamming for longer, trouble-free service.

SPECIFICATIONS

Punch-Down Tool

- 7.3 inch steel construction body
- Weight: 130 gms

Modular Plug Crimper

- 7.5 inch steel construction body
- Weight: 280 gms
- Suitable for 22-26 AWG wires

ORDERING INFORMATION

PART CODE	DESCRIPTION
NTP-001	Punch Down Tool
NTC-001	Modular Plug Crimper

KEY FEATURES

PUNCH-DOWN TOOL

- Adjustable low and high impact force settings allow the punch-down tool to be set according to the user's preference
- Blades are made from heat-treated, high-carbon tool steel with a black-oxide, rust-resistant finish and a precision-ground cutting surface for long life

MODULAR PLUG CRIMPER

- D-Link crimping tools have all-steel handles (with padding)
- Built-in cable stripper with stop to ensure correct strip length continuity tester
